

NEW HOMEOWNER'S GUIDE

2 SIMPLE WAYS TO PROTECT AND PROVIDE FOR YOUR LOVED ONES

Congratulations on the purchase of your home!

Home ownership is a big deal and you have worked hard to get here, now it is time to make some very important decisions.

Don't procrastinate. We know that you feel financially stretched after buying your home—we can help.

- ◆ Do you worry about what would happen to your family if you die prematurely?
- ◆ Are you concerned about what would happen if you could not work due to illness?

Now that you have your homeowners insurance to protect your home/property now it is time to purchase **Mortgage Protection Insurance** using Life Insurance policies. Life insurance is a great way to be sure you continue to protect and provide for your family even if you are no longer here.

Your family can use the death benefit from life insurance to pay off your mortgage so that your family can remain in your home. Some policies grow with cash value over the years which your family can use anyway you choose.

We can help you find a life insurance plan that will work for you and your family and keep your budget in mind.

Protecting your Income... The need for disability income insurance is greater now than ever before. **New homeowners cannot afford to leave their income unprotected.** If we asked you what your greatest asset is, you might say your new home or your job/business. They are both vital to your lifestyle, and are the result of your most **valuable asset—your ability to earn an income.** If you become sick or too hurt to work, what would happen to everything you have worked so hard to build? How will your family manage and what would your future look like?

There are many ways to accomplish protecting your income, speak with us at Park Avenue Benefit Planning, Inc. to help you make the right choices for your family. Contact us today for a free Consultation
